Scheme Benchmark, ## Additional Benchmark

For SIP calculations above, the data assumes the investment of ₹ 10000/- on 1st day of every month or the subsequent working day, Load & Taxes are not considered for computation of returns. Performance for IDCW option would assume reinvestment of tax free IDCW declared at the then prevailing NAV. CAGR returns are computed after accounting for the cash flow by using XIRR method (investment internal rate of return). Where Benchmark returns are not available, they have not been shown. Past performance may or may not be sustained in future. Returns greater than 1 year period are compounded annualized. IDCW are assumed to be reinvested and bonus is adjusted. Load is not taken into consideration. For SIP returns, monthly investment of equal amounts invested on the 1st day of every month has been considered.
